

MAKE ME DREAM OF YOU

Bali is famous for its pristine, bone-white beaches. But a little known secret is that it also has several hidden black sand beaches, a by-product of the many volcanoes that dot the island. Mostly located on the Northern and Western coastlines, with sleepy undisturbed coves in-between, these beaches may be painful to walk on, but make for beautiful photographs. Think Helen Christensen and Chris Isaak in the video for *Wicked Game*.
